ASBI Grouting Certificates

Individuals successfully completing the ASBI Grouting Certification Training and provide verifiable documentation of three years of experience in construction of grouted post-tensioned structures, will receive a certificate as an "ASBI Certified Grouting Technician." The certificate will be valid for a period of *five* years, and will be renewable at the end of that time. Individuals who successfully complete the ASBI Grouting Certification Training and who do not have three years of verifiable documented experience in construction of grouted post-tensioned structures will receive an "ASBI Grouting Training Certificate." In the five year period following completion of the training, individuals with this certificate may obtain an "ASBI Certified Grouting Technician Certificate" upon submission of verifiable documentation of three years experience in construction of grouted post-tensioned structures.

Documentation of three years of experience may be e-mailed to ASBI via email info@asbi-assoc.org.
